XCELITE SCREWDRIVERS

Since printing our last Catalog, conditions we did not foresee have arisen. Alloy steels and plastics have been under strict rationing for some time. It has been impossible to obtain urgently needed raw materials without priorities and sometimes even with them. We are sincerely trying to do our part both for defense and supplying our customers' needs. One thing we will not do . . . we will not sacrifice quality; you can depend on that. Meanwhile, we ask your co-operation in promptly filling out the proper forms to permit our obtaining necessary raw materials.

NEW "A" DISPLAY

of Automotive and Hardware Screwdrivers.

Contains 48 Screwdrivers and 2 Spark Plug Testers.

Overall Height 19 1/2", Weight 20 Lbs.

List price complete\$52.15
For individual item list prices see page 3.

No. 12 DISPLAY

Net Weight 1 1/4 Lbs.

A metal display containing 12 screwdrivers with 1/4" diameter blades in 2", 3" and 4" lengths. Handles have handy pocket clips. Blades made from SAE 6150 CV Steel.

Price complete\$3.75

Price each screwdriver .30

No. 332 DISPLAY

Weight 1 1/4 Lbs.

This display is identical with the No. 12 except it has 3/32" diameter blades. Like all Xcelite screwdrivers, these blades are made from SAE 6150 CV steel—not carbon wire. This is THE screwdriver for Radio knobs and fine instrument work.

Price complete\$3.15

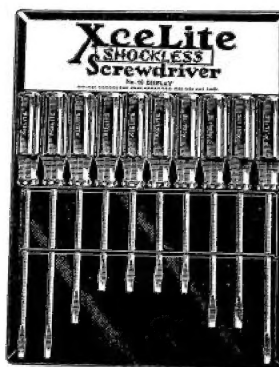

Price each screwdriver25

NEW "A" AND "R & E" DISPLAYS

These displays (the latter shown on the opposite page) have been completely re-designed. The channels on the new displays are enclosed, the front being flush with the top and bottom.

Still another improvement is leaving off all size and price marks from the display itself. Instead, an enameled card is attached to the back of the display giving size, location, list and dealer price of each screwdriver on the display, while a complete price list of all sizes is on the reverse side of the card. This prevents mistakes in pricing when a screwdriver is misplaced on the display. It prevents obsolescence due to possible price changes. Finally it permits the jobber to keep the display full at all times as he can now substitute other sizes of Xcelite screwdrivers without confusion as to price, etc.

By far the greatest improvement has been the complete re-arrangement of the screwdrivers on the displays. Some of the slower selling numbers have been eliminated and the others so arranged that anyone can easily assemble the display and, what is far more important, instantly locate any particular size. We urge you to replace your old display with this new merchandiser. We know you will not regret it.

No. 10 DISPLAY

Net Weight 1 3/4 Lbs.

Similar to the No. 12 display except it contains 10 screwdrivers with 5/32" diameter blades, 3", 4" and 5" long.

Price complete\$5.65

Price each screwdriver55

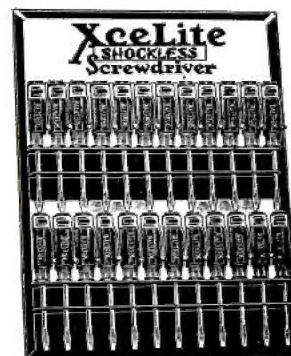

No. 24 DISPLAY

Net Weight 2 Lbs.

This neat metal display "hits the spot" with many dealers. Consists of 24 screwdrivers in the popular 1/8" x 2" size. Handles have pocket clips.

SCREWHOLDING SCREWDRIVERS

Pat. No. 2,206,364

An excellent tool, especially designed for the radio and electrical man. Since the runner is NOT controlled by a coil spring (the tool doesn't even have one), the screwholding members are readily slipped over the end of the blade as a guard to prevent torn pockets.

Attachment instantly and rigidly holds and starts ANY screw, even one without a head. Can also be used for removing screws.

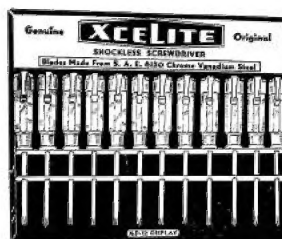

XCELITE Screwholding Screwdrivers are made with 1/8" diameter chrome plated square blades in 3 lengths: 3", 4" and 5".

Packed 12 assorted in metal display.

PHILLIPS SCREWDRIVERS

Phillips screws are meeting with widespread acceptance by manufacturers in nearly every line of business. Cars and trucks use them on mouldings, hinges and for other purposes . . . many radio assemblies employ them . . . not to mention scores of other products for shop, factory, and home.

All our Phillips Screwdrivers are made from alloy (not carbon) steel. Offered in 4 sizes of blade and diameter, and standard lengths—with exception of the short "stubby" blade. Handles are available in either wood or XCELITE.

We have had many requests from our Radio and Electric jobbers for a No. 1 Phillips screwdriver with a longer blade than the regular No. 1. We have accordingly arranged to supply

one with a blade 8" long exclusive of the handle.

HOLLOW SHAFT NUT DRIVERS

This unique, time-saving tool was especially designed for general electrical and radio work. In radio, it is primarily useful in installing and removing volume control and other panel equipment. The nut is readily tightened or loosened without damage to the panel. On telephone or power switchboards, the Hollow Shaft Nut Driver is especially useful where nuts must be installed or removed over long protruding bolts or studs—made with or without insulated shafts. The former for use with high voltage work. Shafts insulated for protection up to 1000 volts; handles to 5000 volts.

XCEL SOCKET WRENCH

The only tool of it's kind

Adjustable!

Pat. No. 1639831
Other patents applied for.

One of the most versatile tools ever developed! The XCEL Adjustable Socket Wrench is a whole tool set in one, with scores of practical uses around filling stations, garages, machine shops, home and farm. It's an easy, light-weight tool to handle—yet super-tough due to its drop-forged construction.

THREE SIZES—6", 8" and 10". (The two larger sizes are especially useful for garage and service station operations.) Each size is adjustable to fit ANY type of nut—standard, oversize or under-size—whether hex or square—and regardless of "burred" corners. The two square and one hex bars (shown above) make this tool quickly adaptable to work on plugs with recessed openings—such as differential, transmission and oiling plugs.

Hammer head of genuine XCELITE fits into the wrench, providing a durable plastic hammer for work on piston pins, body and fenders and other operations requiring a resilient hammer. (Hammer heads are also made in steel.)

8" XCEL WRENCH (Opens to 2 1/4")

—packed 12 to a carton—gross weight 24 lbs. (including bars)

XCEL OPEN END WRENCH SETS

With Detachable Heads

These neat, compact sets of tools bring to open end wrenches all the advantages of detachable socket wrenches. Mechanics agree they're great time savers, yes, and that they prevent many a barked knuckle and sore hands. Light in weight, and perfectly balanced. These wrenches have long "grippable" handles — the kind that makes each job easier and quicker to finish. The heads slip on in a jiffy —and STAY ON until a different size opening is wanted. Narrow jaws permit

working in close quarters inaccessible to many ordinary wrenches.

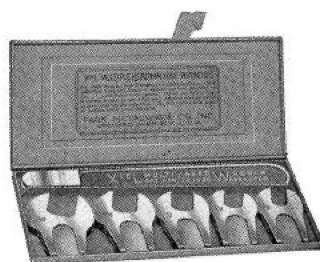

XCEL heads and handles are individually heat treated—so tough, we guarantee them to strip the thread of any standard bolt, or break it, without spreading jaws or breaking wrench.

XCEL Open End Wrenches with Detachable Heads are offered in the two styles below, both sets packed in handy, durable metal boxes, easy to carry in the pocket.

XCEL MULTI-HEAD POCKET WRENCH SET

(An exclusive Park Metalware design)

The XCEL Multi-Head Pocket Wrench Set (above) consists of 20 gauge metal box, 1 straight handle, 5 heads with $\frac{3}{8}$ ", $\frac{7}{16}$ ", $\frac{1}{2}$ ", $\frac{9}{16}$ ", and $\frac{5}{8}$ " openings. Weight per set $1\frac{1}{4}$ lbs.

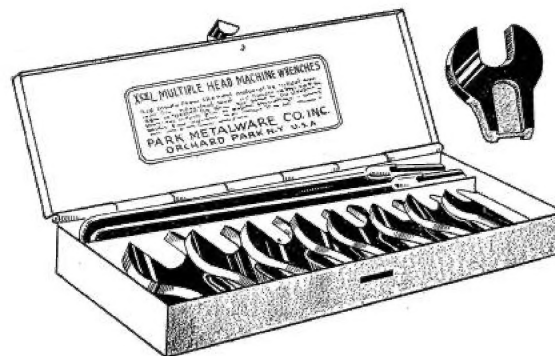

Packed 12 to a carton. Weight per carton, 16 lbs.

Price per set	\$1.25
Price each head25
Price each head $11/16$ and larger30
Price any handle25

Heads and Handles for both these wrench sets are interchangeable and are furnished in satin finish only.

XCEL "STRAIGHT 8" WRENCH SET

(An exclusive Park Metalware design)

The XCEL "Straight 8" Wrench Set (above) consists of 20 gauge metal box, 2 handles (straight, right and left off-set).

Actually every head is equal to 3 standard type wrenches. Heads have the following size openings: $\frac{3}{8}$ ", $\frac{7}{16}$ ", $\frac{1}{2}$ ", $\frac{9}{16}$ ", $\frac{5}{8}$ ", $11/16$ ", $\frac{3}{4}$ ", and $\frac{7}{8}$ ". Weight per set $1\frac{3}{4}$ lbs. Packed 6 to a carton. Weight per carton 11 lbs.

XCEL COMBINATION BOX WRENCH SET

Here's a "custom-built" tool, designed to provide the busy mechanic with a dual-purpose wrench combining two types of openings—box and open end. Constructed of chrome vanadium steel—famous for its strength and toughness—it has been possible to design these wrenches with thin head walls. This is of great value on work in close quarters.

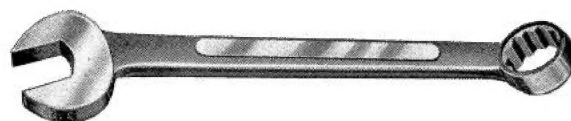

XCEL Combination Box and Open End Wrenches are supplied in 6 popular sizes. Finished in steel grey, with ends and panels polished. Guaranteed to give dependable, time-saving service.

XCEL 12 POINT BOX WRENCHES OF SPECIAL ALLOY STEEL

Mechanics are high in their praise of these quality-built box wrenches. Designed with thin head walls, XCEL 12 point Box Wrenches save time and fussing on nuts in close quarters.

These wrenches are drop forged of special alloy steel. Heads are skillfully broached for exact fit, preventing slippage and rounding corners. All sizes are 45 degree style. Furnished in two finishes.

XCELITE

Tools

XCEL PLIERS

The XCEL line of pliers, designed for radio and similar light wiring work, represents the combined suggestions of leading radio and electrical engineers, as well as radio repairmen throughout the country. This means that XCEL Pliers are outstandingly PRACTICAL tools.

Each plier is constructed of high grade alloy steel, and of the type of alloy best suited to the specific work for

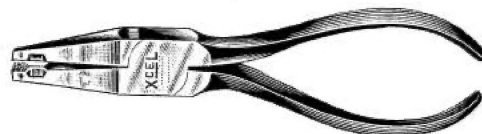

which the tool is intended. Workmanship is held to a high level—all the way from drop forging to the final inspection. Each plier is carefully inspected, not only against flaws, but for correct balance and ease of handling.

All XCEL Pliers are fully guaranteed against defects of material and workmanship. Any plier showing such defects will be willingly replaced if returned to us.

No. 51—XCEL Long Needle Nose and Side Cutter Pliers, 7".
Price \$2.20

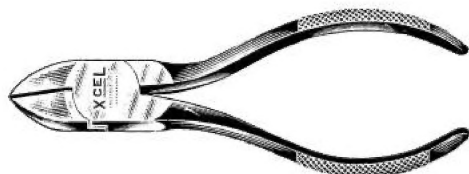

The ideal plier for the radio repair man. The nose is spring tempered and the cutting knives are hand honed. This quality plier is drop-forged from the finest alloy steel—built for lasting serviceability.

No. 58—XCEL Special, 7", for Electricians and Radio. Price \$2.90

Here's an unusual tool that combines the advantages of a diagonal and needle nose plier. Mighty handy for crushing insulation and stripping wire. Knives are hand honed for clean cutting, and are especially useful in difficult "cramped quarters."

Due to the small cross section of metal we cannot guarantee them against breakage due to misuse.

No. 55—XCEL Diagonal, 5". Price \$2.20

This XCEL tool has exclusive features suggested to us by practical-minded radio and electrical engineers. Throat of the jaws is flattened for crushing insulation on wires for quick removal; also for taking out kinks in the wire. The XCEL Diagonal Plier is drop forged of special analysis alloy steel, carefully heat treated, and the jaws are hand honed to a keen, long-lasting edge. This is a special tool, designed for radio and electrical use, and not recommended for general duty.

No. 59—XCEL Chain Nose Electrician's Plier, 7 3/4". Price \$2.50

This is one of those "special use" pliers that finds a prominent position in every radio and electrical worker's kit. Drop forged of the finest alloy steel, with a stream-lined design that "does the trick" when other pliers fail.

No. 77—XCEL Heavy-Duty Diagonal, 7 1/2". Price \$2.75

The head of this plier is similar in design and usefulness to the No. 55 Plier, except for flat throat of jaws. However, the overall construction is larger and heavier, with special handles to give maximum leverage. Here's a sturdy plier for general electrical duty.

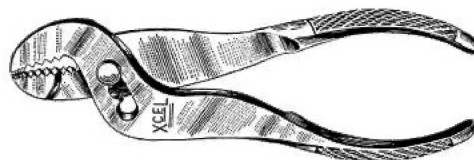

No. 60—XCEL Side Cutting Plier, 6". Price \$1.90

Notice the design of the handles on this plier—here's Leverage, with a capital "L". This plier is lighter in weight than the regular lineman's side cutter and is intended for radio and light electrical work. Drop forged of superior alloy steel, skillfully heat treated, with knives hand honed to keen, hard edge with LASTING cutting qualities.

No. 57—XCEL Extra Long Duck Bill Plier, 7". Price \$2.20

An especially designed plier with extra long jaws to get into those hard-to-reach places. Fits the hand comfortably. Due to the special alloy steel construction, this plier will stand up for years of constant service.

No. 56—XCEL Wrench Plier, 6". Price \$1.10

Here's an exceptionally efficient tool for battery work—as well as all-round general duty. Its design is such that gripping the handle forces the object in against the jaws instead of out and away. Handles anything round, square or hexagonal. Jaws are milled with pipe wrench teeth. Drop forged of tough nickel molybdenum steel, correctly heat treated. Range of jaws 7/8". Three adjustments.

No. 62—XCEL Ignition Plier, 5". Price \$.90

This plier is of the same general construction as the No. 56 except it is much smaller, being 5" long. Extremely useful both for Radio and ignition work.

XCELITE "Combination Detachable" SCREWDRIVER

(PATENT APPLIED FOR)

Here's convenience—and saving—combined in a mighty unique and useful tool. The XCELITE Combination Detachable Screwdriver has a genuine XceLite Shockless Handle, hollow to receive the dual-blade screwdriver units listed below. With this practical XceLite handle and, for example, a No. 2 Phillips blade on one end and a 1/4" XceLite blade on the other, you have TWO screwdrivers for just about the price of one! What's more, you can buy blades of other sizes to fit the same handle. The unique ball fastener on the blade holds the screwdriver unit securely in place—yet readily slips out when desired.

STUBBY TYPE

BLADE COMBINATIONS (Order by Number). No. 1—No. 1 Phillips and 3/8" XceLite; No. 2—No. 2 Phillips and 1/4" XceLite; No. 3—No. 3 Phillips and 5/8" XceLite. STUBBY TYPE (Overall Length 3"). No. S-1 Stubby—No. 1 Phillips and 1/8" XceLite; No. S-2—No. 2 Phillips and 1/4" XceLite; No. S-3—3/8" XceLite and 1/4" XceLite.

PRICES (any of the above combinations): Regular \$1.45, Stubby \$1.10; Extra Handles—Regular \$.75, Stubby \$.65; Extra Blades—Regular \$.75, Stubby \$.50.

Packed 6 to a Box. One Display Card furnished. Weight, Regular—1 3/4 lbs. Stubby—1 lb.

XCELITE "Electricians' Special" SCREWDRIVER

This "Electricians' Special" is a combination of the No. 14 XCELITE Hollow Shaft Nut Driver and a dual-blade screwdriver insert. It will handle any of the above listed dual blades. This combination provides a wrench which will fit the nuts commonly used in switch boxes, meters, etc.—plus a sturdy screwdriver. Unique ball fastener on the blade holds the screwdriver unit securely in place—yet readily slips out when desired.

We recommend ordering the No. 14 Hollow Shaft Nut Driver with insulated shaft.

Blade Combinations are the same as listed above for the XCELITE "Combination Detachable" Screwdriver.

PRICES: No. 14 HS Nut Driver, insulated shaft, \$1.30; plus blade 75c, total \$2.05, with stubby blade (@ 50c), \$1.80.

The

XCELITE

Guarantee of Quality

All XCELITE Tools are built of finest grade materials, and the entire manufacturing process—from design to final inspection—is closely supervised by tool experts.

All XCELITE Tools are unreservedly guaranteed for one year against defective materials and workmanship—and replacements, due to such defects, will be cheerfully made. This guarantee, however, applies only to tool failures which can reasonably be blamed on inherent defects in the tool—and not on failures caused by abuse.

XCELITE NUT DRIVERS With Colored Handles

PAT. APPLIED FOR

Color Flashes the Size!

No more old-fashioned "size hunting" with these new XceLite *DeLux* Nut Drivers. Just glance at the handles — and select the correct size in a split-second. It quickly becomes second nature. These new nut drivers are top quality tools down to the tiniest detail. Handles are made of special plastic which is highly resistant to fire and shock. Sockets are precision formed, free of burrs, fit the nuts snugly. Deep enough to handle two nuts. Depth of shaft hole, 1 1/4".

The unique, metal tool holder is finished in attractive green lacquer. Special locking arm engages the tools and can be padlocked. Screw holes, for attachment to the wall, are so arranged that the locking arm makes the screws inaccessible. When the kit is in use, the wrenches may be hung in slots with handles down for greater speed and convenience.

Here is a great set of tools—quality made for years of service.

DeLux

Nut Driver Set No. 27

in Handy, Lockable Tool Holder

PAT. APPLIED FOR

Price, Set No. 27—complete with 7 nut drivers and holder \$6.10

Weight per set—2 lbs.

PARK METALWARE CO., Inc., Orchard Park, N.Y., U.S.A.

and we think you'll understand

Present war conditions affect the supply of materials available to almost every manufacturer. Here, at Park Metal, we are no exception. Many items of necessity are discontinued—in others, changes have been made . . . To conserve paper, it has been deemed advisable to furnish the following information, rather than to print revised new catalogs. (And since changes are constantly occurring, a new catalog might be out of date in a few days.)

Changes - Page by Page

PAGE 2

The XceLite Screwdrivers are still available but the metal display boards and units are not available.

PAGE 3

R & E and #5 display discontinued for duration.

The following Square and Round Blade XceLite screwdrivers have been discontinued for the duration.

Square Blades

S-183, 184, 185, all S-316 series, S-5161, 51610, 51612, S-3818 and S-71612.

Round Blades

R-182, R-5324, 5328 and R-142.

PAGE 4

The kits shown at top of page are now supplied in canvas to replace the red fabrikoid formerly used. The Junior Kit and Electrician's Kit have been discontinued for the duration. Spark Plug Testers and Screw Holding Screwdrivers except T-181 are available.

The pocket Phillips Screwdriver No. P-12 display is not available but the screwdrivers can be furnished.

Displays

Please do not throw away your XceLite Metal Displays. They cannot be replaced until after Victory.

PAGE 5

On the Phillips Screwdrivers the display kits are not available but the screwdrivers can be supplied. XceLite Tool Holders shown at bottom of page are supplied only with complete set of tools shown. Holders not supplied separately.

PAGE 6

A No. 17 Nut Driver display is supplied with complete nut driver set, but the display racks are no longer supplied separately.

PAGE 7

The six inch Xcel Socket Wrench described in the lower right hand corner has been discontinued for the duration.

PAGES 8, 9, 10

All Wrench Sets and Pliers illustrated and described on these three pages have been discontinued for the duration.

PAGE 11

The XceLite "Electricians Special" Screwdriver shown in the middle of the page has been discontinued for the duration.

Standard Packages

In accordance with WPB rulings, orders for less than standard packages will be filled with the minimum standard package.
